KAZIM KAYHAN

Frontend Software Engineer & Team Lead | React.js, Next.js, TypeScript

Kabul, Afghanistan | +93 730 634 343 | kaziminbox@gmail.com | linkedin.com/in/kazimkayhan | github.com/kazim-kayhan

PROFESSIONAL SUMMARY

Frontend Software Engineer with 5+ years of experience building fast, scalable web applications with React.js, Next.js, and TypeScript. Currently leading frontend development for a German auto-parts retailer's e-commerce storefront, B2B partner portal, and internal dashboards, improving performance 30%, cutting load times 25%, and reducing production bugs 17%. Also experienced in web3/NFT products, UI/UX design, and full-stack Laravel development.

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, PHP, SQL
Frontend: React.js, Next.js (App Router), TanStack Query (React Query), Zustand, React Hook Form, Zod, next-intl
UI & Styling: Tailwind CSS, shadcn/ui, Radix UI, Material UI, design systems, responsive design, accessibility
Backend, Web3 & Tools: Laravel, REST APIs, Auth.js, Ethers.js, Web3.js, Vitest, Playwright, Git, Biome, Vercel
Practices: Frontend architecture, performance optimization, code splitting, lazy loading, i18n, code review, Agile/Scrum
Design & Leadership: UI/UX design, wireframing, prototyping, user testing, mentoring, team leadership
Spoken Languages: English (full professional proficiency), Persian/Dari (native)

PROFESSIONAL EXPERIENCE

Frontend Developer & Team Lead — Mar 2024 – Present

Autoteile Stark (formerly X10 Car Parts Solutions GmbH) | Germany (Remote)

- Led the frontend team building a sales management dashboard in Next.js, TypeScript, and shadcn/ui, owning the Order, Sales, Inventory, Supplier, Shipment, and User modules.
- Boosted dashboard performance 30% by optimizing React rendering and introducing a modular component architecture.
- Shipped a real-time cost management module that cut operational costs 20%.
- Cut page load times 25% and improved UX with code splitting, lazy loading, and Tailwind CSS.
- Reduced production bugs 17% by introducing error tracking and rollback strategies.
- Built the autoteile-stark.de e-commerce storefront in Next.js (App Router) and TypeScript: product catalog, cart, checkout, and German/English localization with next-intl.
- Built the internal back-office panel (orders, inventory, purchasing, finance, user roles) and a German/English/Polish B2B partner portal with TanStack Query, React Hook Form, and Zod, tested with Vitest and Playwright.
- Set code standards (TypeScript, Biome, Husky pre-commit hooks), ran code reviews, and mentored junior developers.

Frontend Software Engineer — Jan 2022 – Nov 2023

The Code Giant | British Columbia, Canada (Remote)

- Designed and built web3 and NFT product interfaces in React.js, Next.js, and TypeScript, integrating crypto-wallet connection and NFT minting flows with Ethers.js and Web3.js.
- Led UX for the Tropyverse (tropyverse.com) virtual land marketplace, from research, wireframes, prototypes, and user testing to the production frontend.
- Led UI design, minting interfaces, and developer handoff for The Mad Mouse Circus and Rich Cycle Rebels NFT launches.

Full-Stack Developer — Mar 2021 – Jan 2022

Anaarsoft Technology Services | Kabul, Afghanistan

- Designed and shipped the company website in React.js and Material UI, increasing web traffic 50%.
- Built and maintained scalable Laravel (PHP) backend systems and REST APIs, improving reliability and maintainability.
- Collaborated with cross-functional teams across the full software development lifecycle, from concept to deployment.

Web Developer Intern — Nov 2020 – Mar 2021

Abar Bit | Kabul, Afghanistan

- Developed responsive React.js components for a school management system, improving performance and usability.

EDUCATION

Bachelor of Computer Software Engineering — Aug 2018 – Dec 2022

Kabul University | Kabul, Afghanistan
